I'm not sure how useful it would be without something to compare to, such as if there fish deployed at a reference site or time 0 fish (fish before deployment).

Hi Dan and Kristen,

I'm writing to check in to see if you have any interest in the 109 sentinel fish that CPW put out for 96 hours. They are tiny (~1.5 inch) rainbow trout. CPW is probably going to keep them for only 3 weeks unless someone is interested.

Feel free to give me a ring if you want to discuss: 404-276-1057.

Maggie
